

# ENVIRONMENTAL STRATEGY AND DELIVERY PLAN 2022-2024

## PROGRESS UPDATE:

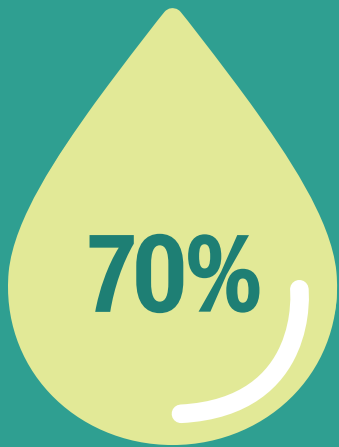

**35** Objectives complete or on track to be delivered

### KEY PROGRESS:

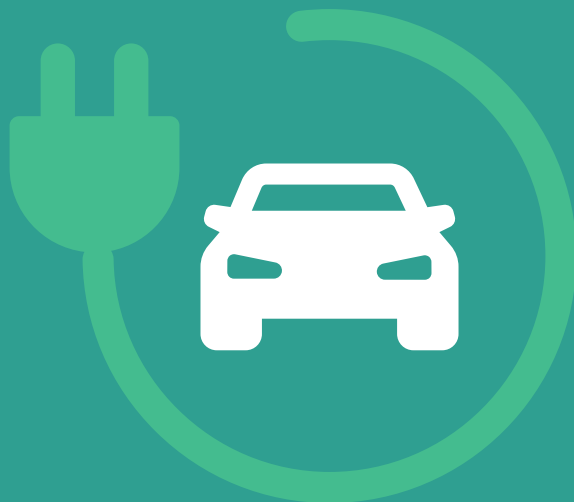

Our waste collection fleet was transitioned to Hydrotreated Vegetable Oil (HVO) fuel in April 2022, reducing our carbon footprint by over 70%.

**130,000**

We are on track to plant 130,000 trees in the district.

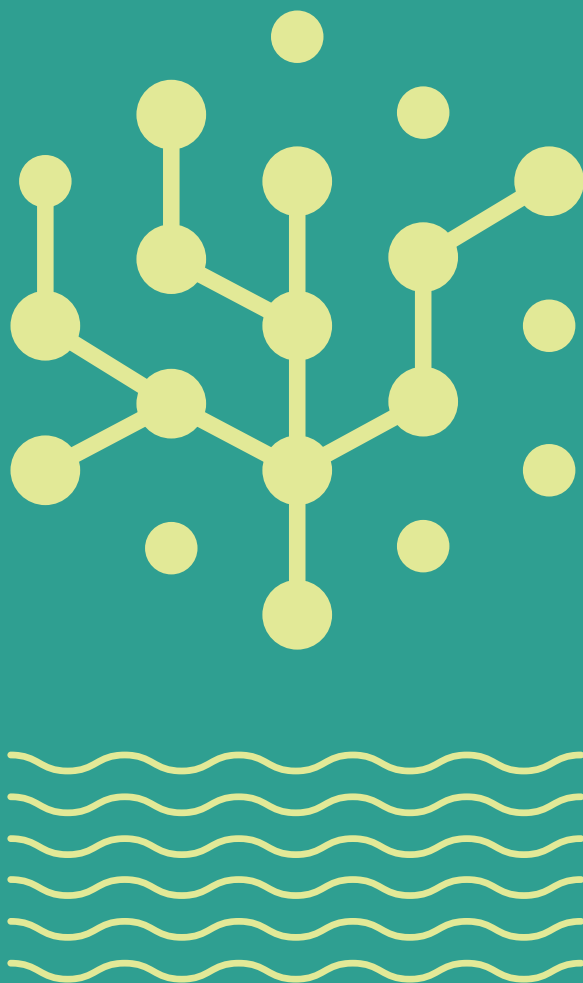

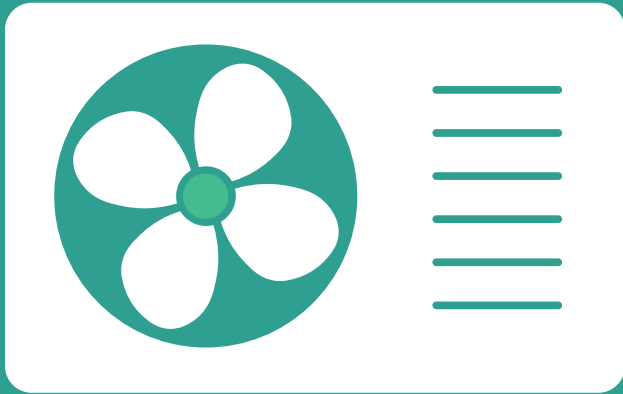

We are expanding electric vehicle chargepoint provision across the district by installing chargers in our car parks, and we have already installed them at our council offices.

Our Sustainable Home Scheme is available to all of our residents, offering interest free loans for retrofit and renewables.

### OTHER KEY ACHIEVEMENTS:

We have installed air source heat pumps at our council office, with expected savings of 50 tonnes of carbon dioxide emissions per year

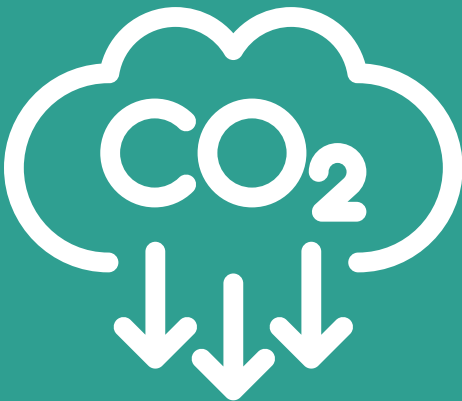

We are project partners in the Clean Hydrogen Strategy and Roadmap for the Cambridge Norwich Tech Corridor

We have established a joint venture company with other Norfolk partners to secure mitigation to reduce the nutrient levels in our important waterways.

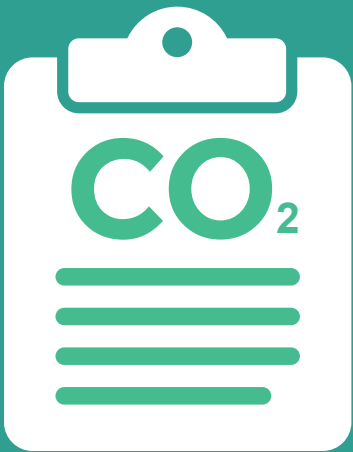

### WHAT WE ARE WORKING ON THIS YEAR:

Expanding the provision of Carbon Literacy training

Continue to deliver energy efficiency and clean heating improvements for domestic properties through the Warm Homes programme

We are writing our 2023/24 carbon footprint report that will be published on our website once complete
