

PROGRESS  
UPDATE:

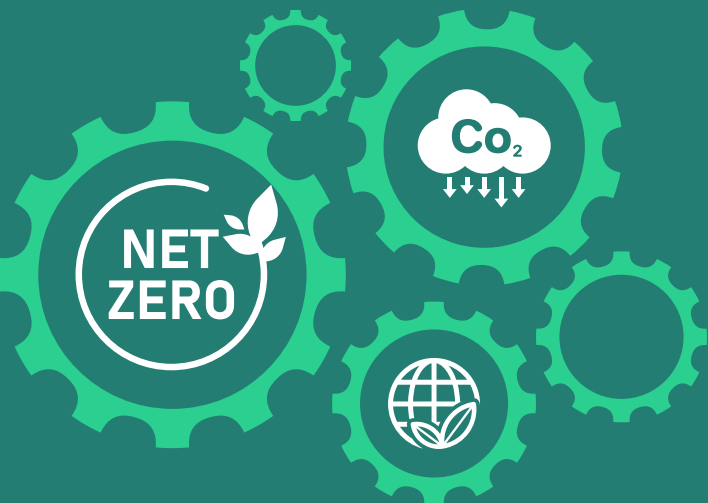

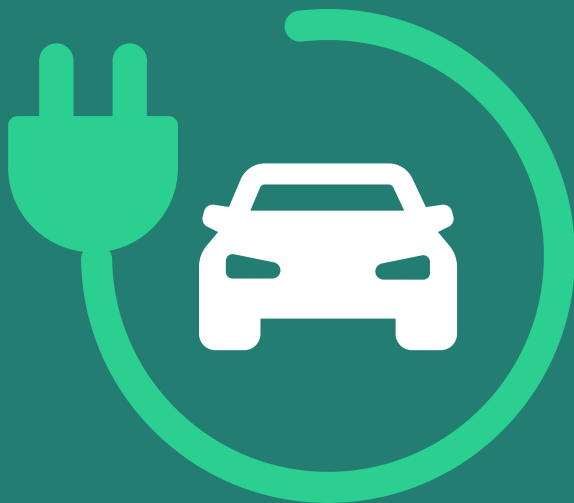

Objectives  
complete or  
on track to be  
delivered

- Objectives complete on track to be delivered
- Work yet to commence
- Figures to be confirmed

KEY PROGRESS:

We have expanded electric vehicle chargepoint provision across the district by installing chargers in our owned car parks and at our council offices.

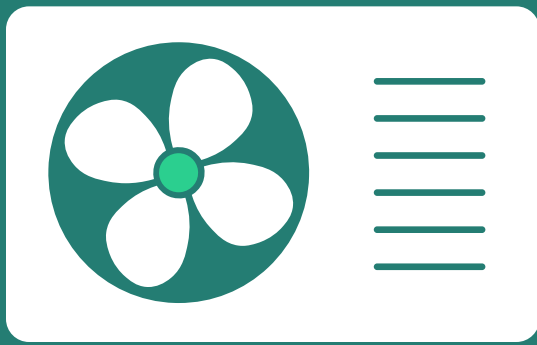

We are delivering Net Zero Go training sessions for our businesses, supported by Groundwork East.

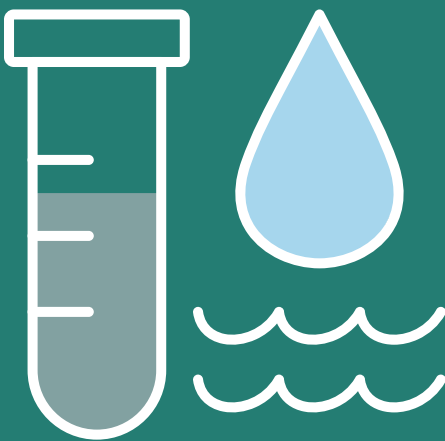

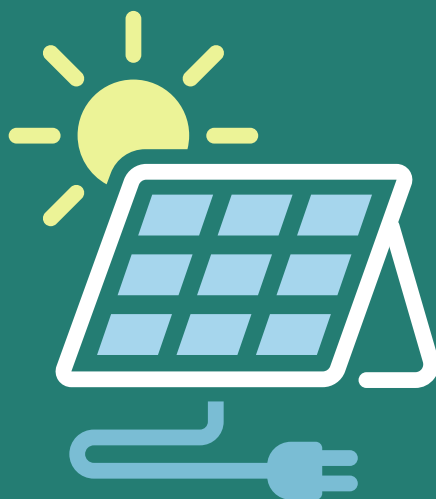

We are project partners in the Clean Hydrogen Strategy and Roadmap for the Cambridge Norwich Tech Corridor.

We installed air source heat pumps at our Council Offices, Diss Leisure Centre and one of our Temporary Housing accommodation sites saving the equivalent of **322 tons** of CO<sub>2</sub> each year

We are carrying out a host of energy efficiency measures at our council operated leisure centres, including insulation, installing solar PV, and an air source heat pump.

We have established a joint venture company with other Norfolk partners to secure mitigation to reduce the nutrient levels in our important waterways.

All staff within the council's Corporate Management Leadership Team are Carbon Literacy accredited.

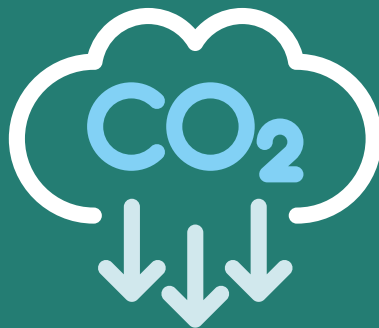

OTHER KEY ACHIEVEMENTS:

Electric vehicle chargepoint and solar PV grants are available to our parishes and community groups

WHAT WE ARE WORKING ON THIS YEAR:

Expanding the provision of Carbon Literacy training

We are writing our 2023/24 carbon footprint report that will be published on our website once complete
