

Foundation Training and Build Up Grant

Meet Mikey Seago and Lewis Buckley, Focalise Finance

We heard about the grants at the Business Breakfast and applied for Business Builder support as soon as we decided to launch our own company. First, the online Foundation Course made us think about areas we hadn't considered fully, even though we were confident about what it took to run a business. We are still using some of the handy templates! The next step after launch was applying for the Build Up grant which allowed us to invest properly in marketing. We're really proud of our branding, website and marketing plan and, with a professional marketing strategy in place, we are still seeing the benefits of this original investment.

Our Business Builder experience was brilliant! From start to finish the process was super easy and everyone involved was so helpful. Business Builder says its core values are to be helpful and support local businesses and this was exactly that.

Mikey Seago and Lewis Buckley are putting their 15 years' finance industry experience into offering a more human approach to finance broking. With 70 lenders on the Focalise Finance panel they are supporting business with their investment in assets.
