PLANNING CONTROL

Works of Improvement

Path AD

The path AD will remain as a trod path across the cultivated field with the access from Cliff Close as shown on the photograph being improved by the laying of a durable hard surface finish from the field boundary to the existing cul de sac head in Cliff Close and the cutting back of the hedge either side to provide a suitable entrance. An approved hit and miss style barrier will be erected to prevent unauthorised of the path by motor vehicles.

Unauthorised Access from Cliff Close

The existing path has been created by unauthorised access over the years. The slope will be levelled and paved from the cul de sac head on Cliff Close to the field boundary and the existing "barrier" replaced with an approved safety barrier to a spec agreed with the highway authority.

Path BC

Path BC is an existing public footpath known as FP2, and has a registered width of 1.5m. It presently has an unmade surface with an average trodden width of around 0.8m, which has been hardened in parts using stone and ash. The first 20 m from its junction with The Hills rises up a short slope and is surfaced in a mixture of concrete and tarmac. This length (20m) will be resurfaced in a suitable material either by over covering in tarmac or relaying in concrete on a suitably prepared base to provide an even surface. The existing raised kerb at the junction with the Hills will be lowered to NCC specification and an appropriate hit and miss style safety barrier erected.

The surface of the path from point B to point C will be levelled across the registered width of 1.5m and receive a 75mm top dressing of suitably compacted hoggin. Where necessary, works to provide a firm base for the top dressing will be carried out.

The existing junction with the Havaker is level and access is gained between an existing garden wall and the latch post of a field gate. It is not proposed to change this arrangement.

Where path DE joins path BC, the existing berm will be removed and level access created between the two paths.

Path DE

This path has recently been constructed as a permissive path linking Station Road with FP2 and is presently a trod path along the field boundary. The proposed development would replace the lower portion of the path with an adopted road and with the path extending from the cul de sac head around the eastern end of the development and continue on its existing line eastwards to meet FP2.

The width of the path will be increased to 1.5m to match the registered width of path BC with a 75mm top dressing of hoggin laid on a 100mm base of MOT type one all suitably compacted and on geotextile as set out in the email to Graham Worsfold f 18th January 2016

Existing junction of path BC (FP2) with The Hills

The kerb will be dropped to NCC specification, the damaged barrier replaced and the first 20m resurfaced in tarmac or concrete to a width of 1.5m

**Existing junction of FP 2 with the
Havaker**

This arrangement will remain unchanged
