

Norfolk County Council's Dynamic Purchasing System

Through this grant scheme you can opt to use the Dynamic Purchasing System (DPS) set up by Norfolk County Council (NCC).

A dynamic purchasing system is a framework of suppliers that suppliers can join at any time. The DPS is designed to give buyers access to a pool of pre-qualified suppliers.

The EVCP installers on the list have been pre-vetted and the EVCPs installed will provide a quote that meets these criteria:

- 1 charge point with 2 sockets, either wall mounted or pedestal.
- Chargers will be 22kW where there is 3 phase electricity, if not then 7kW chargers will be installed.
- The charger will allow payment through contactless payments.
- The installer will contact the DNO to make sure that the EVCP can be accommodated.
- Quote will include any additional electrical infrastructure required.

Please note that the quotes will not include an additional electricity meter if one is required, this is the responsibility of the applicant.

The process:
