**Visualisation**

Landscape and Visual Impact Assessment  
Deal Farm, Bressingham

**Annex D1 - Visualisation: Viewpoint 2**

D1.1 - Visualisation: Viewpoint 2

Description of existing view

A distant representative view from the northeast looking southwest towards the Site from the eastern end of public right of way Shelfanger FP2 where it meets High London Lane. The Deal Farm complex to the southwest of the site (and immediately adjacent to it) is visible on the distant horizon backdropped by vegetation beyond. This is the first of a sequence of views moving southwest along the PROW and taller AD plant structures just to the left of the existing farm buildings will be visible and will break the horizon line. Even though it is a distant view, the new AD plant structure may break the horizon line formed by the more distant vegetation.

Visual receptors would mainly be walkers on the public right of way. Their susceptibility is judged to be high as they are likely to be walking for recreational purposes. The value of the view is judged to be low as it is not subject to any planning designations. Overall visual receptor sensitivity is judged to be MODERATE.

Viewpoint 2 - Data
