- 3 To retain, protect and enhance the ponds and drainage ditches of the Land;
- 4 To retain, enhance or recreate landscape "buffers" between the Proposed Development on the Land and adjacent, roads and public rights of way, and to minimise the visual effect of the Development on the wider countryside;
- 5 To use vegetation as a sympathetic "psychological" and physical barrier in preference to hard landscaping, wherever possible;
- 6 To use a native indigenous species (where possible of local provenance);
- 7 To create/restore heathland habitat;
- 8 To provide an integrated footpath/cycleway network for "residents" of the scheme which links into the wider public rights of way network;
- 9 To ensure that appropriate management follows the successful establishment of the landscape proposals; and
- 10 To provide a mechanism for monitoring and reviewing the Landscape Management Plan and the specified operations.

## **SCHEDULE 2**

- 2 The strategy set out in this Landscape Management Plan incorporates the objectives and prescriptions for the approach to be adopted in the maintenance and management of the Landscape associated with the proposed holiday lodge development at the Land. The management procedures will be undertaken with professional landscape design and management advice and will be implemented following the completion of the landscape proposals for the grounds in conjunction with the Developer (or its representative) who will be responsible for programmes of operations and monitoring.
- 3 The management operations specified in this report are based on an initial five-year period of works, but should ideally extend for 25 years and beyond. However, during the course of the operation of this Plan, a programme of monitoring should be initiated on an annual basis to appraise the effectiveness of the works, and to establish any changes in site conditions. Within the Plan periodic minor management variations in response to local changes can be accommodated, but any major changes will necessitate a review of the scope of the operations.
- 4 A review of the Management Plan will be undertaken on behalf of the Developer on the expiration of a period of five years from the date from which the new landscape works were implemented. This review will assess the extent to which the measures undertaken in the previous five years have achieved the objectives of the Plan and will identify whether the same measures should continue or different methods introduced in order to achieve such objectives. It is envisaged that this 5 yearly review will continue over a period of 25 years.
